EDUCATION

Universidad de Oviedo

Oviedo, Spain

BSc. Industrial Engineering, GPA: 8/10

2023 – Now

- Honors in Statistics, Chemistry, Advanced Calculus, Automation Engineering.
- Erasmus+ Exchange, Angel Kanchev University — Ruse, Bulgaria (2025)
- Exchange Student, National University of Kaohsiung — Kaohsiung, Taiwan (2026)

ADDITIONAL EDUCATION

Zrive

Remote

Applied Data Science Program (15 weeks, part-time)

2026

- Designed end-to-end machine learning solutions: business problem formulation, data acquisition (APIs), EDA, feature engineering, model training and evaluation.
- Applied statistical learning techniques (linear & non-linear models, regularization, cross-validation, hyperparameter tuning) with robust model assessment and metric selection.
- Built modular ML pipelines following software engineering best practices, collaborating via Git/GitHub and delivering a 5-week real-world project with an industry partner.

London School of Economics

London, United Kingdom

Business Analysis and Valuation, GPA: A+

Summer 2025

- Intensive course covering financial modelling, DCF analysis, capital structures and valuation techniques.

PROFESSIONAL EXPERIENCE

Aily Labs

Madrid, Spain

Data Scientist Intern

Summer 2026

- Developed and fine-tuned ML models end-to-end, with emphasis on LLMs and agentic AI; built reusable Python packages, data pipelines, and analysis frameworks for production deployment.
- Translated business requirements into technical specifications; performed data discovery across new sources and implemented data verification procedures for cross-team use.

Successful Fund VC

Castellón, Spain

Analyst Intern

Summer 2025

- Conducted market research and financial analysis of 30+ early-stage B2B SaaS startups to support investment decisions.
- Participated in pipeline sourcing and screening, presenting key findings to partners.
- Developed financial models (Cohort analysis, LTV/CAC analysis, MRR, Churn modelling) using data-driven approaches and valuation benchmarks to assess startup scalability and growth potential in pre-seed stages.

Arcelor Mittal

Avilés, Spain

Summer Intern – R&D Financial department

Summer 2024

- Developed the three financial statements for the Spanish R&D division and analyzed the economic viability of a green hydrogen production plan (cost evaluation, pricing and future trend analysis).

ADDITIONAL INFORMATION

- **IT Skills:** Python (NumPy, Pandas, Scikit-Learn, Statsmodels), SQL, Git/GitHub, Microsoft 365
- **Languages:** Spanish (native), English (Fluent, Cambridge Advanced Certificate), Chinese (Intermediate, Hsk III)
